

# NETZERO - ROADMAP TO 2050

This indicative roadmap shows the Island's journey to net zero by 2050. It is provided for illustrative purposes. Further details of policies and proposals can be found in the Climate Change Plan or at [netzero.im](https://www.netzero.im). There will likely be a shift from operational emissions to embodied emissions during the period of this roadmap. Embodied carbon is the amount of carbon emitted during the construction of a building. Operational carbon is the amount of carbon emitted once a building is in use.
